

MWH Soft 2006 International User Conference

Advances in Geospatial Infrastructure Modeling and Management Technology

October 2-3, 2006 – Niagara Falls, Ontario, Canada

Niagara Falls, Canada will be the center stage for our 4th International User Conference. This informative event will provide attendees with two days of content rich workshops, technology demonstrations and presentations associated with the latest advances in water distribution and sewer collection modeling, optimization and management. It offers you a wealth of critical learning and an invaluable forum for exchanging cutting-edge information, proven strategies, cost-effective solutions and best practices among the water and wastewater industries' movers and shakers.

If you are a water/wastewater industry professional who is involved in any and/or all aspects of the operation and production of water distribution and sewer collection systems and are interested in maximizing the application of network modeling, information technology, and asset management, then you definitely want to plan on attending this important and highly regarded technical event. Attendance is essential if you want to hear from the experts and take advantage of this outstanding opportunity to join in the geoen지니어ing debate, benchmark against, uncover new solutions, and network with your peers in the water/wastewater industry and hone your management skills and enhance operations. **Attain prestige and gain maximum exposure by showcasing your work and environmental contributions.**
